

Power Bank Air 6000

XB100

We proudly present our new, contemporary and stylish Power Bank range: Power Bank Air 6000, Power Bank Trip 9000 and Power Bank Free 15.000.

The Power Bank Air 6000 offers an internal li-polymer, with a capacity of 6000mAh. Enough energy to fully recharge a smartphone up to three times.

With this indispensable accessory, you can simply recharge your mobile device anywhere you go. In that way you can provide your smartphone, tablet, GPS, MP3 and other mobile devices with extra energy while you are on the go.

Unique detail of the Power Bank Air is the fast charging time; input (5V/2.0A) and output (5V/2.1A) charge 2x as fast as a power outlet! Two mobile devices can be recharged at the same time, due to the device's 2 USB outlets.

The LED indicator of the Power Bank provides you with the energy (still) available. With a simple press on the button you can start and stop the charging procedure. By using the built-in USB cable the Power Bank Air can be recharged directly by USB or AC.

This Power bank Air 6000 is ideal for business travels, holidays and daily use. With this manageable mobile charger you are always equipped with a back-up battery whenever and wherever you need it.

Easy, convenient and secure!

In short:

- Universal Power Bank with 6000mAh internal battery
- Charges 2x as fast as an AC
- Suitable to charge 2 devices at the same time
